

Bobolen Ears Inflammation

Medical Device

Bobolen Ears Inflammation in form of drops is a medical device destined for children above 1 years old and adults. It eliminates swelling and pain accompanying inflammations connected with presence of wax plug in the external acoustic duct. It is used for care, keeping clean and proper dryness of the external acoustic duct. It softens and removes the excess of earwax and other excretions accompanying inflammatory states of the external ear.

Content:

Ingredients: light paraffin oil, medium chain fatty acids triglycerides, lavender oil, geranium oil.

How to use:

Use strictly according to doctor's recommendations or in a way described below. Introduce 3-5 drops to acoustic duct. Use 3-4 times a day for 3 days.

Before use read the instruction carefully.

Do not use after expiry date.

Packing:

- 10 ml
