

# Omegamed Optima Forte

Soft capsules + hard capsules

Dietary supplement.

Product for pregnant women and breastfeeding women.

Omegamed® Optima Forte is a preparation worked out specially for pregnant women. Optimal content worked out with participation of specialists ensures everyday portion of ingredients which are important for development of brain and eyes in foetus and breastfed infants\*.

Omegamed® Optima contains 5 recommended ingredients for pregnant women:

1. DHA from algae (Life's DHA®): 600 mg
2. Complex source of folates ActiFolin®: folic acid (400 µg) + active form of folic acid (400 µg)
3. Vitamin D: 2000 i.u.
4. Iodine: 200 µg
5. Iron: 30 mg

Omegamed® Optima Forte doesn't contain fish oil thanks to which the product is well-tolerated and doesn't intensify nausea.

\*Health claim: „Consuming of docosahexaenoic acid (DHA) by mother supports proper development of brain and eyes in foetus and breastfed infants”. Beneficial effect appears in case of consuming 200 mg of DHA daily over consuming of omega-3 fatty acids for adults, i.e. 250 mg of DHA and eicosapentaenoic acid (EPA).

Varied diet and healthy lifestyle are important to stay healthy.

## Content:

DHA capsule: capsule content: oil from microalgae Schizochytrium sp. containing DHA (docosahexaenoic acid) [algal oil; high oleic sunflower oil; antioxidants: tocopherol-rich extract, fatty acid esters of ascorbic acid]. Capsule shell: gelatin; humectant: glycerol; colour: iron oxides and hydroxides.

Optima capsule: capsule content: iron [iron (III) diphosphate (iron (III) pyrophosphate); maltodextrin; emulsifier: lecithins]; cholecalciferol (vitamin D); anti-caking agent: magnesium salts of fatty acids; glucosamine salt of (6S)-5-methyltetrahydrofolate (folic acid-active form); pteroylmonoglutamic acid (folic acid); potassium iodine (iodine). Capsule shell: gelatin, colour: titanium dioxide.
