

Solbaby Cough

Dietary supplement

Agave syrup for children above 1 year old.

Cough is a body reaction to irritation of nerve endings in damaged mucosa of the upper respiratory tract. The most frequent types of cough are: wet and dry. Wet cough is accompanied by expectorating of mucus. Dry cough remains after recent infection and in case of allergy or as an effect of action of non-specific irritant factors (cold or dry air, physical exercise, straining of vocal cords).

Varied diet and healthy lifestyle are important to stay healthy.
