

Solbaby Throat

Dietary supplement

Agave syrup for children above 1 years old.

Problems with throat very often affect children in autumn-winter period. They are accompanied by throat irritation and dryness.

One of the methods used supportively in case of discomfort connected with throat problems in small children is applying of syrups prepared on the basis of plant extracts, e.g. propolis is traditionally used for its beneficial effect on mucosa of the upper respiratory tract. Mallow works soothingly on throat. Ribwort plantain brings relief in case of throat irritations and larynx. Discomfort connected with throat is very often accompanied by irritation of mucosa so it's very important to syrup didn't contain any additional ingredients such as preservatives or colours.

Varied diet and healthy lifestyle are important to stay healthy.
